

Condenser Protection Grill Protects the condenser from damage

Wireless Remote Controller For ease of operation.

360° Turbo Flow All round airflow in 360° direction

Enables faster and efficient cooling

6 Row Coil

Filter Sign

Indicates the filter cleaning period by lamp. Connectable Distributing Duct

Can make extension of supply air. Weekly Timer Different ON-OFF times can be set for each day.

Self Diagnosis Enables automatic detection of errors in the unit for easy trouble shooting

Since the front panel is easy to remove, maintenance is also easy.

Washable Panel

Silicon Coated PCB

Silicon coating on PCB protects from dust, water and humidity.

Up / Down Swing Flaps The up/down flaps automatically swing up and down.

Powder Coated Outdoor Unit Powder coated body ensures extra protection

Anti Corrosion IDU

Prevents refrigerant leak by coating the heat exchanger with an epoxy resin.

Group Controller A number of indoor units can be operated at the same time using a wired remote controller

Wired Remote Controller Programmable wired remote, for ease of operation in busy commercial spaces.

Hyper Tropical Spec Tropical design for high ambient operation upto 52°C.

Tropical Spec Tropical design for high ambient operation upto 46°C/48°C.

Advanced Hyper tropical spec Tropical design for high ambient operation upto 55°C.

Rear Cabinet Protection To protect the coil from damages due to sun and sand.

Mildew Resistant Filter Prevents mold formation

Connectable Fresh Air Duct

Left / Right Swing Flaps The left / right flaps automatically swing left and right.

Fresh Air Intake

Compressor Insulation Blanket Sound insulation blanket and rubber mounting on compressor, reduces the noise

Fan speed Control Number of steps of airflow control.

Weekly + Setback timer Weekly + Setback timer can set temperature for two time spans and for each day of the week.

Power Airflow Dual Flaps Can flatten out during cooling operation to deliver cool air to the corners of the room.

Automatically reduces the level of humidity and

maintains the preset temperature.

**BLDC Motor Indoor Unit** 

Specially designed BLDC motor for smooth & energy efficient operation

Inner Groove Copper Tube IGT copper tube heat exchanger ensures better performance.

Catechin Filter The catechin filter uses static electricity to clean fine particles and dust in the air.

**Program Timer** This digital timer allows selection of one of four options: ON, OFF, ON $\rightarrow$ OFF or OFF $\rightarrow$ ON.

Long Pipe Easy and extended location of indoor unit to outdoor unit with full efficiency.

Coanda Airflow technology

Cold air is discharged along the ceiling and is delivered far away for long reach and comfortable cooling and to avoid direct air blast on body.

**Energy Saving mode** 

This mode raises the set temperature slightly in the cooling mode and lowers the set temperature in the heating mode to economically control the operation of the unit.

High Voltage Protection

Designed to withstand surge voltage and prevents the PCB from breakdown.

Human Sensor

Human sensor detects movement of people in the room and judges whether energy saving operation

Wide Angle Louvers The smoothly curved wide angle louvers provide wide airflow coverage for effective cooling independent of indoor unit placement in room.

Dual suction Intake Design Warm air is sucked in through dual intakes enabling larger volume of air to be cooled for fast

Limits the maximum operation current. and performs operations with the power consumption suppressed.

Economy Mode

quiet operation.

**Quiet Operation** High efficiency fan construction and large independently driven diffuser ensures

Corrosion Resistant ODU The outdoor unit's heat exchanger fins are processed with special coating to avoid salt

The exclusive Wireless LAN adaptor (optional accessory) enables to operate the air conditioner by smartphone or tablet PC.

Blue Fin Condenser Adoption of strong blue fin hydrophillic coated heat exchanger provides protection against rust and salt damage

AFM Technology

Advanced Frequency Modulation Technology increases the maximum speed and efficiency

PM 2.5 Filter

Cleans the air by catching particles as small as 0.3 ~ 2.5 µm.

Double Swing Automatic - 3D Complex swing action of flaps enables automatic swing in both horizontal and vertical directions, which enables 30 unique configurations

Sensor Function The remote controller automatically adjusts the indoor temperature according to the detected ambient temperature

Auto Restart In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is

Automatic Airflow Adjustment The micro-computer automatically adjusts the airflow effectively to follow the changes in room temperature

The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

Super Wave Technology

The unique design of the vertical louvers in front will enable the air sweep at wider angle for better distribution

**Backlit Remote** 

Backlit display on wireless remote controller enables easy operation in a darked room.

Temperature Display Displays indoor set temperature and indoor ambient temperature on the indoor unit.

Auto Clean Function Indoor fan will operate at low speed for a while after turning off the unit by remote controller to prevent mold formation.

Auto Moisture Prevent During Cooling and Dry modes if the vertical air direction louvers are operated outside their proper operating range of (1) - (3) for more than 20 minutes. they will automatically return to the (3) level in order to prevent moisture condensation and water dropping from the air outlet. This can be disabled by following
